

Find the size of your ring

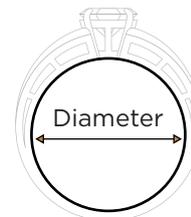

Print the document

1. Print the document in A4 format and make sure the page scale is set to 'none' in the print options.
2. Place your credit card and make sure it is exactly inside the shape.
3. If the measurement is not accurate, check that you are printing in 'full size' and reprint.
4. Be careful not to have selected the 'Fit to Page' print option.

Overlay a ring

1. Place the ring above the circles below until you find one where the printed circumference is just visible inside your ring.
2. If a ring falls between two sizes, we recommend using the larger size.
